

VIPIN | B.PHARM JSS NOIDA (2023-2027)

Academic Qualifications			
Year	Qualification	Institute	%/CGPA
2027	B.Pharm	College of Pharmacy JSS, Noida	Pursuing
2021	Class 12	KENDRIYA VIDYALAYA NOIDA	80.4%
2019	Class 10	KENDRIYA VIDYALAYA NOIDA	74.4%
Internships			
ESIC Hospital, Noida Sector-24 Store Management Trainee			
- Analyzed inventory movement and stock utilization data to support efficient medicine availability and reduce stock discrepancies. - Maintained and analyzed inventory, expiry, and consumption datasets using Microsoft Excel to support pharmacy operations and reporting.			
Academic Projects and Skills			
Projects	DIAS – Drug Interaction Awareness System AI-Powered Healthcare Decision Support Platform - Designed and developed a web-based healthcare platform for identifying drug-drug and food-drug interactions with severity classification and clinical recommendations. - Built a pharmacovigilance dashboard for monitoring adverse drug reaction (ADR) trends, severity distribution, and medicine usage patterns. - Developed modules for ICSR reporting, patient counselling support, and medication safety awareness. - Integrated analytical dashboards to transform healthcare data into actionable insights for safer medication practices. - Created responsive interfaces supporting healthcare professionals in clinical decision-making.		
	PV Sentinel – AI-Powered Pharmacovigilance Analytics Platform Drug Safety Signal Detection & Risk Intelligence System - Developed a pharmacovigilance intelligence platform for adverse drug reaction (ADR) monitoring and signal detection. - Designed analytical dashboards tracking 5,000+ ADR reports, signal trends, severity distribution, and risk prioritization metrics. - Implemented evidence-based signal detection methodologies including PRR, ROR, Chi-Square, and Information Component analysis. - Built risk assessment and prioritization modules enabling faster identification of potential drug safety concerns. - Generated actionable insights through interactive visualizations and regulatory-compliant reporting workflows.		
Skills	Analytics: SQL, Excel, Python, Power BI Visualization: Power BI, Tableau Tools: MS Project, Git, VS Code		
Achievements & Professional Development			
Projects & Innovation	Developed DIAS (Drug Interaction Awareness System), an AI-powered platform for drug-drug interaction detection, pharmacovigilance monitoring, ICSR reporting, and patient counselling support.		2025
	- Built PV Sentinel, an AI-powered pharmacovigilance analytics platform for ADR signal detection, risk prioritization, and drug safety intelligence. - Applied healthcare domain knowledge with analytics and dashboarding concepts to solve real-world medication safety challenges.		2026
GCP Certification	- Good Clinical Practice (GCP) Certification – NIDA Clinical Trials Network (Valid till 2029) - Training completed in Clinical Research Ethics, Informed Consent, Participant Safety, Adverse Event Reporting, Documentation & Regulatory Compliance		2026
